PROVEN TO LAST LONGER THAN STAINS

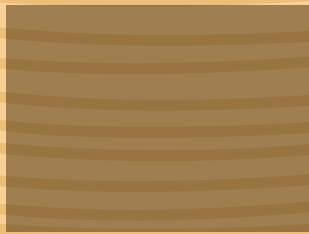

Timbakote® Timber Finishes are water based coatings developed to protect and enhance the natural beauty of timber, cement and stone products. Designed for New Zealand's variable and, at times, harsh climate; these products will withstand all weather conditions giving longer lasting protection.

RECOMMENDED USES

Timbakote® Timber Finishes are ideal for coating exterior timber cladding, pergolas, gazebos, fences, timber joinery, garage doors, CHH Shadowclad ply sheeting, James Hardie textured weatherboard, Weathertex cladding and interior timber surfaces.

NOTE

All colours are printed as accurately as modern printing processes allow. However, the final colour achieved will be determined by the profile, age, species of timber and application technique. To be sure of your choice use a Timbakote® colour sampler to coat some of the Timbakote® finish coat onto a sample of your chosen timber or substrate.
